Page Notes

Power aliases required by this page:
- =PP3V3_ALL_SMU
- =PP3V3_ALL_RTC
- =PP3V3_PWRON_SMU
- =PPVREF_SMU (SMU AVCC OR 2.5V REFERENCE)

Signal aliases required by this page:
(NONE)

BOM options provided by this page:
(NONE)

NOTE: CPU current/voltage monitoring (CPU_SENSE_I/CPU_SENSE_V) requires 100K/10uF RC filter at SMU pins. Caps should connect to GND_SMU_AVSS. SMU_VREF should be same signal or reference used by monitoring circuit, but be aware that this will affect other analog inputs such as AC adapter ID.

NOTE: All analog inputs to SMU should have a 100pF capacitor to the SMU AVSS signal (GND_SMU_AVSS). None of those capacitors are provided on this page.

NOTE: Some primary and alternate functions reuire pull-ups that are not. provided on this page. Please. review the latest SMU specification to ensure missing pull-ups are provided on another page.

NOTE: Pinout matches SMU pinout v1.51.

Shasta drives PCI RESET, but its output
may not be valid during power-up, so
it is ANDed with a reset from the SMU.

Page Notes

Power aliases required by this page:
- _PP5V_PWRON_USB
- _PP5V_PWRON_UDASH
- _PP3V3_PWRON_UDASH
- _PP3V3_PWRON_BT

Signal aliases required by this page:
(NONE)

NOTE: This page is expected to contain the necessary aliases to map the USB pairs to their appropriate destinations and/or to properly terminate unused signals.

BOM options provided by this page:
(NONE)

NOTE: USB pairs are NOT constrained on this page. It is assumed that the USB Host Controller page will provide the appropriate constraints to apply to entire USB D+/D- XNets.

neoBorg Implementation

NOTE: This design does not provide power control on USB ports 2-4. Rename USB controller outputs to indicate single-pin connections.

External USB Ports
