

## Disassembling IBM ThinkPad A30 RAM

### Tools used in this guide

- [Phillips #1 Screwdriver](#) (1)

## Step 1 - Battery

- Place the ThinkPad on its back.
- Slide the highlighted tab to the left.
- With your finger on the tab, remove the battery by lifting it outwards.

## Step 2 - RAM

- Remove the two 5.3mm cover screws.
- Gently lift the cover containing the RAM.

### Step 3

- Remove RAM module by pressing the two metal pieces outward with your thumbs.

### Step 4

- Lift the RAM module up and out, away from the yellow connector.
- Place the RAM module away from any magnets or static electricity prone areas.

To reassemble your device, follow these instructions in reverse order.
