

Installing IBM ThinkPad T42 Hard Drive

Tools used in this guide

- [Small Phillips Screw Driver](#)

Step 1 - Hard Drive

- Unscrew the screw holding the Hard Drive slot in place.

Step 2

- Pull the hard drive out with the help of pictured ridges. Cautiously maneuver it out - it might help to open the display slightly.

Step 3

- Pull Hard Drive out and replace with new one. Then screw back in.
