Repairing Power Mac G4 Quicksilver Video Adapter

Tools used in this guide
- [Phillips #0 Screwdriver](#)

Step 1 - Opening the case

- The handle to open your computer is located on top of the right side panel.

Step 2

- Grab the circular handle and pull outward.

Step 3

- Your computer is now open and ready for repair.

Step 4 - Video Adapter

- This is your Power Mac G4's video adapter.

Step 5

- Start by removing the screw holding the card to the chassis as shown.

Step 6

- Before lifting the card out, this small plastic tab needs to be pulled back there by releasing it entirely.

Step 7

- With the tab and screw removed, lift the card straight out.
- When putting the card back in, take care to apply even pressure across the top with your thumbs. This will avoid damaging the card.
