

# Repairing Power Mac G4 Quicksilver Video Adapter

## Tools used in this guide

- [Phillips #0 Screwdriver](#)

## Step 1 - Opening the case

- The handle to open your computer is located on top of the right side panel.

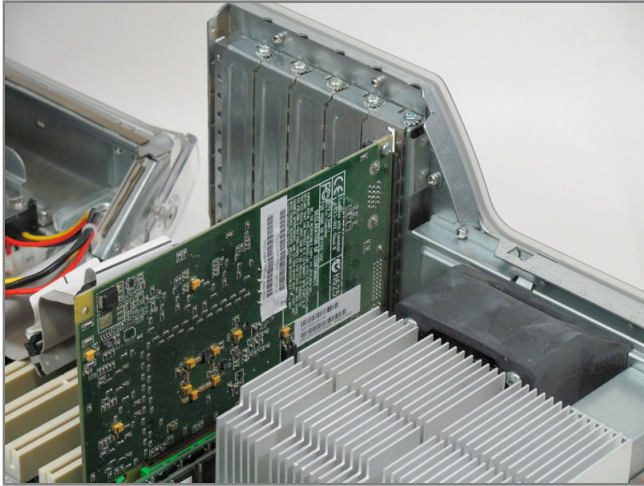

### Step 2

- Grab the circular handle and pull outward.

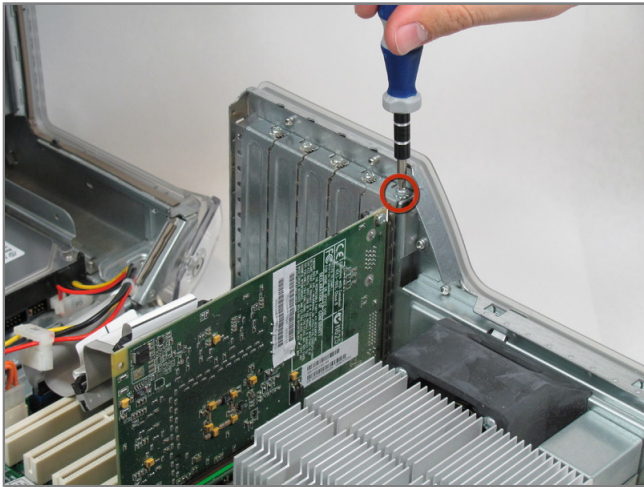

### Step 3

- Your computer is now open and ready for repair.

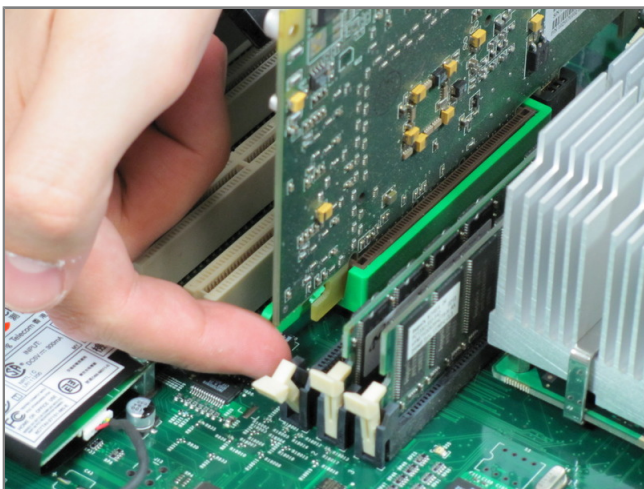

#### Step 4 - Video Adapter

- This is your Power Mac G4's video adapter.

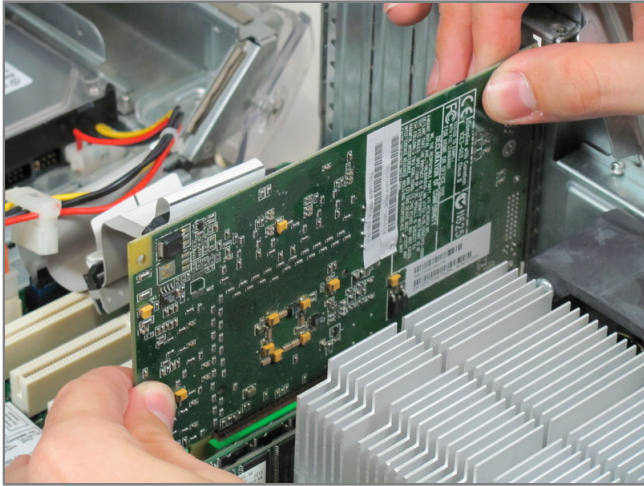

#### Step 5

- Start by removing the screw holding the card to the chassis as shown.

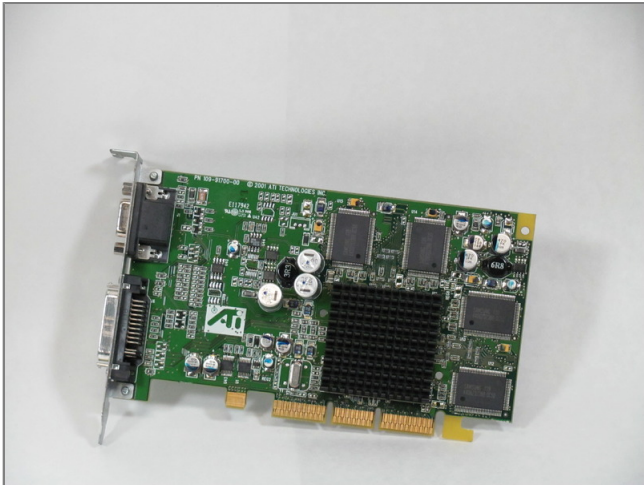

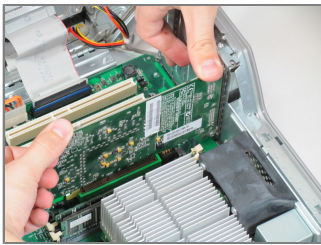

#### Step 6

- Before lifting the card out, this small plastic tab needs to be pulled back there by releasing it entirely.

## Step 7

- With the tab and screw removed, lift the card straight out.
- When putting the card back in, take care to apply even pressure across the top with your thumbs. This will avoid damaging the card.

## Step 8 - Video Adapter

- Your card is now completely removed and ready to be replaced.
