

# **Installing Power Mac G5 Backup Battery**

### Step 1 - disassembly Side Panel

- To avoid electrocution, shut down the computer. Do not open the computer or attempt to install any items inside it while the computer is on.
- To avoid being shocked wait at least 10 minutes to allow the computer's internal components to cool.

#### Step 2

 Remove all the cables, including the power cables before opening the unit.

# Step 3

- Lift the tab to unlock the side panel.
- The panel should fall out. If the panel does not fall out by itself pull a little from the edges.

## Step 4

• Remove the air deflector (the clear plastic cover) by pulling on the handle.

#### Installing Power Mac G5 Backup Battery

# Step 5 - Backup Battery

• Locate the battery inside the desktop.

#### Step 6

- Remove the battery by lifting the battery from the battery terminal.
- It is important to lift the battery as straight up as possible to avoid damage to battery or terminal.

# Step 7

- The area should look like this after the battery is removed.
- Be sure to properly dispose of the old battery after removal (take it to the nearest hazardous waste center).
- Only insert LS1425OC 3.6V battery to prevent damage to the logic board.
