

Installing Power Mac G5 Graphics Card

Tools used in this guide

Phillips #1 Screwdriver

Step 1 - disassembly Side Panel

- To avoid electrocution, shut down the computer. Do not open the computer or attempt to install any items inside it while the computer is on.
- To avoid being shocked wait at least 10 minutes to allow the computer's internal components to cool.

Step 2

 Remove all the cables, including the power cables before opening the unit.

Step 3

- Lift the tab to unlock the side panel.
- The panel should fall out. If the panel does not fall out by itself pull a little from the edges.

Step 4

• Remove the air deflector (the clear plastic cover) by pulling on the handle.

Step 5 - Graphics Card

• Locate the graphics card in the desktop.

Step 6

• Using a Phillips # 1 screw driver, unscrew the screw right next to the graphics card.

Step 7

• Last thing to do is to gently shake the card out of it's slot by pulling it straight out.
