

## Installing Power Mac G5 Memory

### Step 1 - disassembly Side Panel

- To avoid electrocution, shut down the computer. Do not open the computer or attempt to install any items inside it while the computer is on.
- To avoid being shocked wait at least 10 minutes to allow the computer's internal components to cool.

### Step 2

- Remove all the cables, including the power cables before opening the unit.

## Step 3

- Lift the tab to unlock the side panel.
- The panel should fall out. If the panel does not fall out by itself pull a little from the edges.

## Step 4

- Remove the air deflector (the clear plastic cover) by pulling on the handle.

## Step 5 - Front Fan Assembly

- Locate the front fan assembly.

## Step 6

- Pull the fan assembly out; it should slide out easily.

## Step 7 - Memory

- Locate the Memory on the Apple G5.

## Step 8

- Pull the ejector pins away from the memory edges.

## Step 9

- After the pin ejectors have been unlocked, carefully pull the memory card outwards.
