

**First International Computer, Inc**  
Protable Computer Group HW Department

Board name : Mother Board Schematic

Project :

Version :

Initial Date :

1. Schematic Page Description :
2. PCI & IRQ & DMA Description :
3. Block Diagram :
4. Nat name Description :
5. Board Stack up Description :
6. Schematic modify Item and History :
7. power on & off & S3 Sequence :
8. Layout Guideline :
9. switch setting

# 1. Schematic Page Description :

- |                               |                                   |                              |
|-------------------------------|-----------------------------------|------------------------------|
| 1. Title                      | 21. CRT Connector                 | 41. LED / DIP SW             |
| 2. Schematic Page Description | 22. TV-Out VT1623M                | 42. Screw Hole               |
| 3. Block Diagram              | 23. VT8237A PCI/USB (1/3)         | 43. EC_PMX                   |
| 4. ANNOTATIONS                | 24. VT8237A IDE/AC-LINK (2/3)     | 44. Power Block              |
| 5. Schematic Modify           | 25. VT8237A V-LINK/MII/LPC (3/3)  | 45. POWER (CPU CORE)         |

| 7. DDR Layout Guideline       | 27. Reset Circuit                 | 47. Charger                  |
| 8. Yonah processor (1/2)      | 28. VT6103L LAN PHY (10/100Ms)    | 48. DCIN                     |
| 9. Yonah processor (2/2)      | 29. USB CNN                       | 49. 5VDDA/S/M, 3VDDA/S/M     |
| 10. CPU Thermal               | 30. MINI / MDC / BT / CCD         | 50. 1.05VDDM/1.5VDDM         |
| 11. Clock Generator           | 31. USB2.0 HUB IC                 | 51. 2.5VDDA/M, 1.5VA/1.8VM   |
| 12. Clock Buffer              | 32. AU6366 (Card Reader)          | 52. DDR 1.8VDDS/0.9VDDM      |
| 13. VN896 Host (1 OF 4)       | 33. Express Card                  | 53. Daughter Board           |
| 14. VN896 DDR2 (2 OF 4)       | 34. Blank                         | 54. (U) USB Board            |
| 15. VN896 Video (3 OF 4)      | 35. Firm Ware Hub                 | 55. (F) Finger Printer Board |
| 16. VN896 Power (4 OF 4)      | 36. INT K/B /LID/GP               |                              |
| 17. DDR2 SO-DIMM0             | 37. S-ATA HDD / ODD CONN          |                              |
| 18. DDR2 SO-DIMM1             | 38. Azalia VT1708A Codec          |                              |
| 19. VT1634AL LVDS Transmitter | 39. AMP MAXIM9789AETJ             |                              |
| 20. LCD Connector             | 40. HP / MIC IN/ Int. MIC/LINE-IN |                              |

## 2. PCI & IRQ & DMA Description :

| IDSEL | CHIP                   |
|-------|------------------------|
| AD17  | Mini PCI(Wireless LAN) |
| AD23  | CardBus                |

| PCIINT | CHIP            |
|--------|-----------------|
| IRQA   | MiniPCI/NB      |
| IRQB   | MiniPCI/CardBus |
| IRQC   | MiniPCI         |
| IRQD   |                 |

| BUSMASTER   | CHIP                   |
|-------------|------------------------|
| REQ         |                        |
| REQ0 / GNT0 | MiniPCI                |
| REQ1 / GNT1 | CardBus                |
| REQ2 / GNT2 | Mini PCI(Wireless LAN) |
| REQ3 / GNT3 |                        |
| REQ4 / GNT4 |                        |

| IRQ Channel | Description                          |
|-------------|--------------------------------------|
| IRQ0        | System timer                         |
| IRQ1        | Keyboard                             |
| IRQ2        | (Casacde)                            |
| IRQ3        | LAN / MODEM                          |
| IRQ4        | Serial Port                          |
| IRQ5        | AUDIO / VGA / USB                    |
| IRQ6        | FLOPPY DISK                          |
| IRQ7        | LPT                                  |
| IRQ8        | RTC                                  |
| IRQ9        | ACPI                                 |
| IRQ10       | FIR (Disable by default) (MODEM/LAN) |
| IRQ11       | Cardbus                              |
| IRQ12       | PS/2 mouse                           |
| IRQ13       | FPU                                  |
| IRQ14       | HDD                                  |
| IRQ15       | CDROM                                |

| DMA Channel | Device                                 |
|-------------|----------------------------------------|
| DMA0        | FIR (disable by default) (MODEM / LAN) |
| DMA1        | ECF                                    |
| DMA2        | FLOPPY DISK                            |
| DMA3        | AUDIO                                  |
| DMA4        | (Cascade)                              |
| DMA5        | Unused                                 |
| DMA6        | Unused                                 |
| DMA7        | Unused                                 |

### 3. Block Diagram :

## 4. Net name Description :

### Voltage Rails

|           |                                             |
|-----------|---------------------------------------------|
| DCIN      | Primary DC system power supply              |
| PMU5V     | 5.0V always on power rail by LATCH or ACIN  |
| PMU3V     | 3.3V always on power rail by LATCH or ACIN  |
| 5VDDA     | 5.0V always on power rail by DCON or PSUSC0 |
| 3VDDA     | 3.3V always on power rail by DCON or PSUSC0 |
| 3VDDS     | 3.3V power rail                             |
| 5VDDS     | 5.0V power rail                             |
| 3VDDM     | 3.3V switched power rail                    |
| 5VDDM     | 5.0V switched power rail                    |
| Vcore_CPU | Core Voltage for CPU                        |

|             |                                     |
|-------------|-------------------------------------|
| VCCP        | 1.05V for AGTL+ Termination Voltage |
| 1.8VDDM     | 1.8V for CPU PLL Voltage            |
| DDR 0.9VDDM | 0.9V DDR Termination Voltage        |
| 1.5VDDM     | 1.5V switched power rail            |
| 1.5VDDS     | 1.5V power rail                     |
| 1.5VDDA     | 1.5V always on power rail           |
| 2.5VDDS     | 2.5V power rail for DDR             |

### Part Naming Conventions

|    |                          |
|----|--------------------------|
| C  | = Capacitor              |
| CN | = Connector              |
| D  | = Diode                  |
| F  | = Fuse                   |
| L  | = Inductor               |
| Q  | = Transistor             |
| R  | = Resistor               |
| RP | = Resistor Pack          |
| U  | = Arbitrary Logic Device |
| Y  | = Crystal and Osc        |

### Net Name Suffix

|   |                     |
|---|---------------------|
| 0 | = Active Low signal |
|---|---------------------|

### Signal Conditioning

|     |                                     |
|-----|-------------------------------------|
| _D_ | = Damped (by a resistor)            |
| _Q_ | = Isolated (by a Q-switch)          |
| _L_ | = Filtered (by an inductor or bead) |

## 5.Board Stack up Description

### PCB Layers

|         |                                                                                     |                                         |
|---------|-------------------------------------------------------------------------------------|-----------------------------------------|
| Layer 1 |  | Component Side, Microstrip signal Layer |
| Layer 2 |  | Power Plane                             |
| Layer 3 |  | Stripline Layer                         |
| Layer 4 |  | Stripline Layer                         |
| Layer 5 |  | Ground Plane                            |
| Layer 6 |  | Component Side, Microstrip signal Layer |

**SATA Layout Note:**

- \* Zdif = 100 Ohm +/- 10%. TX & RX should refer GND.No via & stubs.The Best layer is Top.
- \* TX/RX trace length < 2 inches.
- \* TX+/- need matching trace  $\pm 10$  mils length.
- \* RX+/- need matching trace  $\pm 10$  mils length.
- \* SATA Pair to Pair Trace matching trace  $\pm 10$  mils length.
